## Eliminate The Causes Of Chronic Sinusitis At Their Source!

Laboratory tests have demonstrated that Agrumax™ can be used as a fungicide, a bactericide, an antiseptic, and an antioxidant. A Mayo clinic study linked mold and fungi in the nasal cavities with chronic sinusitis, so some doctors recommend using Agrumax in a saline nasal spray application for the elimination of fungi and sinus irritants. Agrumax is an all-natural, anti-fungal concentrate that has no known toxicity or side effects. Agrumax is also safe to use while using other saline or steroid nasal sprays. All Purpose NAS-12™ is a safe, non-chlorine, non-toxic, biodegradable, virtually odorless cleaner. It is designed for removal of mold and mildew stains, but the improved formula works equally well on all household dirt. Just spray NAS-12 on, let stand for a few minutes, scrub lightly with sponge or cloth, and rinse.

Reapply every couple of years, and mildew could be a worry of the past (showers may require more frequent application). Mild, non-toxic, virtually odorless solution works on any surface where mold and mildew grow including basement floors and walls, crawl spaces, indoor plant soil, bathroom and kitchen surfaces, boats, lawn furniture, brick, painted surfaces, and roofs (please note: do not use on glass or natural stone). The new formula lasts longer, requires less shaking, and stays mixed longer. No More Mildew will not work properly with chlorine/bleach based cleaning products. Quart bottle covers 75 sq. ft.

## Our Healthy Dreams™ Pillow Stops The Growth Of Cold And Flu Germs

Most pillows begin growing mold, bacteria, and dust mites soon after you start using them, and the problem only gets worse over time. That's because we breathe moisture into our pillows as we sleep. But we designed our exclusive new Healthy Dreams pillow with the Micrenza™ bio-filter to be the first truly germ-free, mold-free, and allergen-free pillow available, so you can sleep safely without breathing in harmful biological particles that cause congestion and infection. No other pillow has a filter to protect you.

- The outer 300TC cotton fabric of the pillow is bonded to a soft, stretchable, ComforTech membrane that keeps moisture from passing into the pillow.
- The cotton shell has been treated with a germ and mold fighting agent to keep anything from growing on the surface.
- All of the air that enters into or out of the pillow must pass through the Micrenza bio-filter to ensure that nothing harmful enters into it.

The Best Encasings Money Can Buy!

# Made In America Just For You.

While most sewing manufacturers are going "off shore", all of our fabric encasings are made in a National Allergy owned sewing plant in North Georgia by employee-owners of the company. Not only are we able to contribute to the American economy by employing American workers, but we also have total control over production quality. And we use special tests to make sure that the fabrics, seams, and zippers in our encasings protect you and your family from allergens in your pillows, mattresses, box springs and comforter covers.

We also thoroughly inspect every encasing we make for quality workmanship. Most manufacturers only inspect random samples, but we decided that was not good enough for our customers. Our goal is to make the best encasings in the world...
